

Demanding More from Wireless Sensing

MODEL

EV3-AT

DESCRIPTION

Asset Transponder

Based on our approach, this Asset Transponder enjoys dramatically reduced power consumption and boasts a battery lifetime of more than 6 years, a major improvement over other solutions. Also our smaller electronics size allows greater flexibility in conforming to required battery, package dimension and other considerations. When deployed in an EV-3 interrogator network, this transponder represents an improved value in asset management and control.

With the EV3 family of products, it has never been easier and more cost-effective to dramatically increase visibility of assets in-transit through a complex supply-chain, monitor security breaches, and provide a more reliable and timely supply network.

The EV3-Series of hardware products is designed to provide dramatically improved functionality at a much more attractive price point than was attainable by previous conventional Active RFID design approaches. With the judicious use of Integrated Sensor and ASIC technologies, improved sensing and other value-added capabilities have been included across the family of products, while still improving the size, power consumption, and end-user cost of our hardware products. Consequently, any supply-chain management network built on these devices will enjoy an improved ROI along with significantly enhanced functionality, visibility, and security control. Additionally, products in the EV3 family are fully compliant and interoperable within the ISO 18000-7 standard and DoD RFID Equipment Guidelines.

Model	Asset Transponder EV3-AT
RFID Protocol	ISO 18000-7:2008 + DoD 18000-7 RFID equipment guidelines
Frequency	433.92 MHz
Range	350 feet unobstructed when mounted to a container
Antenna	Omni-directional internal
Power	A' size 3.6 V primary lithium (Li-SOCl ₂), user replaceable
Battery Life	> 6 years at 2 collections/day
Weight	4.5 oz (127 g)
Dimensions	6.5" L x 2.37" W x 1.42" H 16.26 cm x 5.52 cm x 3.61 cm
Operating Temperature	-30 C to +70 C
Storage Temperature	-40 C to +70 C
Dust and Moisture	IP 64
Memory	2 Kbytes
Beeper	Audible beeper for tag location
Compliance	FCC Part 15.240 and Part 15.231 IC certified RSS-210 HERO no restrictions EMI safe on any aircraft
Low Battery Indicator	From interrogator

3810 Varsity Dr.
Ann Arbor MI 48108

About Evigia

Evia is the industry leader in utilizing integrated sensor and ASIC technologies to dramatically improve the functionality and cost of Active RFID hardware products. These advances allow significant improvement in the performance and cost of asset-management supply chains. The network's functionality, visibility, and security control are dramatically increased, while the underlying hardware products themselves benefit from smaller size, lower power consumption, and lower cost with our solution approach. The EV3-Series family of products are fully compliant and interoperable within the ISO 18000-7 standard. Let us show you how Evigia's solutions can improve your supply chain networks.
